Introduction :

The team HB9S was again operating this year from scout center "Les Pérouses" near Geneva with five operators. An other team was operating the JOTI at same location.

Radio Equipment :

- a first HF station, connected to a 3 elements beam, was dedicated to 20m and 15m bands
- a second HF station was dedicated to 40m with a 2 éléments antenna built by DL9BCP
- a third station HF station, with a dipole, was dedicated to PSK31
- one VHF-UHF transceiver, connected to a vertical antenna, was used for local contacts and to listen the ISS space shuttle, or collect some nice SSTV pictures from ISS
- one PC was dedicated to Echolink operation via the local ADSL line

All contacts have been confirmed by a special QSL card.

Beam, WSB flag, FD4 and 80m dipole

Some special calls out of the JOTA log :

Special callsigns for the Jota week-end or special event stations:

9H100MRSG, 9H100S, CT9500AEP, ZD7SSG, 3DA0SS, JE7YSS, YF2ZJH
TA51JOTA, ES5JOTA, A47JOTA, IR0JOTA, ON4JOTA

The traditional JAM suffixes :

AM8JAM, CE3JAM, DL8JAM, HB9JAM, LA1JAM, LA3JAM, LA4JAM, OH2JAM,
PA6JAM, TC1JAM

Some good friends in radio scouting :

VE3MYF (Len), LA8RU (Tormod), CE3TLE (Isabel), and so many others...

Some good DX on 40m band : YB6ZAK and 11 stations from the States

General comments :

With exception of some members of WSB and some scouts leaders from Geneva having a meeting there on Saturday evening, there was no special visitor. We had less contacts this year, but a few short openings on 15m bands let us understand that the new solar cycle is starting and we can expect more interesting long distance contacts next year. Once again we spent an excellent JOTA week-end in Satigny with a great team of scout operators.

Yves, HB9AOF, station manager
